

BRW 470 VA / BRW 470 VA/R Floor Cleaning Device

Manually operated floor cleaning devices made of stainless steel, including coupling to connect the spray pistol.

For cleaning of industrial floors in assembling or storage areas OERTZEN offers floor cleaning models BRW 470 VA and BRW 470 VA/R ("R" = wheels) being most effective accessories for cold and hot water high-pressure cleaners.

The BRW 470 VA - equipped with brush skirt - is most suitable for polished surfaces, as e.g. epoxy-resin. Wheel-assisted BRW 470 VA/R excellently cleans rough surfaces, as e.g. tiles.

A rotating nozzle bar, equipped with 2 high-pressure nozzles easily removes even sticky, persistent and heavy dirt layers. This process can be supported by injecting detergents.

Although the nozzle bar is rotating at approx. 3000 1/min - pressing water through the nozzles at a max. pressure of 250 bar - no polluted water is splashing through the brush skirt; most important feature in food processing industries.

Working width of 470 mm ensures constantly effective cleaning 5 times faster than by hand. Easy to manouvre: the BRW 470 VA/R with 4 swivel wheels - especially on rough surfaces.

Technical data	BRW 470 VA	VA/R
Working width	470 mm	
Working pressure (max.)	250 bar	
Temperature (max.)	90°C	
Capacity	500 m ² /h	
Support	brush skirt	wheels
Weight	7 kg	8 kg
Order No.	10.800.845	10.800.847
