

BRW 350 VA / 470 VA Floor Cleaning Device

Manually operated floor cleaning devices made of stainless steel - simply connect to high pressure cleaner - cold or hot.

For high pressure cleaning of soiled industrial floors in assembling or storage halls and areas. With floor cleaning devices BRW 350 VA and BRW 470 VA OERTZEN presents robust, powerful and effective accessories to go with hp cleaning machines.

Equipped with 2 hp nozzles mounted on a rotating bar, the BRW 350 VA - as well as BRW 470 VA - removes easily hard, heavy, oily or sticky dirt layers from the surface to be cleaned. BRWs can be coupled to cold and hot high pressure cleaners - even detergents can be injected.

A brush skirt prevents polluted water from splashing around - no Aerosols will occur. BRWs give you an all-over and thorough cleaning result - much quicker than by hand.
