

VacLav 2 Aircraft Waste Line Descaling Ground Support Unit with Standard Equipment

VacLav 2:
2 hp pumps creating pressure hp water
and vacuum simultaneously
Order No: **10.801.039**

VacLav 2 Adaptor

Adaptor is connected to waste line of aircraft toilet. On opposite side of adaptor a drain cleaning hose with special nozzle is inserted into tubing system. To this VacLav 2 adaptor a discharging waste hose is connected additionally to the conical end.
10.800.754

VacLav 2 Retro Recoil Nozzle

removes crystalline residues (urine scale) powerful but damage-free from walls of waste lines. This nozzle pulls itself forward through waste lines because of it's backward directed nozzle jets. It's nozzle guiding spring on top supports that pull.
10.800.765

VacLav 2 working hose reel with counter (A 320 option)

VacLav 2 working hose reel with counter (A 320) is connected to VacLav 2 adaptor for descaling aircraft waste lines.
10.000.288

VacLav 2 Double Blind Socket

for sealing waste tubes between waste tank and waste lines before descaling
10.800.758

VacLav 2 Boroscope

for checking aircraft waste lines before and after descaling process, battery powered, cable length 20 m
10.800.757

VacLav 2 Remote Control

for remote control of cleaning and discharging pumps during waste line descaling
10.800.755
